Weekly Status Report 01

This week, we all reviewed research articles on similar projects to gain a better understanding of how our project might end up. We also looked into a few different APIs (preferably open-source) to select one that's best-suited to our project. We are continuing our research into 5G radios to get a better understanding of the hardware we need to purchase. All this will help us during next week's client meeting when we will be submitting a draft of our task roadmap for the rest of the year.
